## Texas State Operations Center

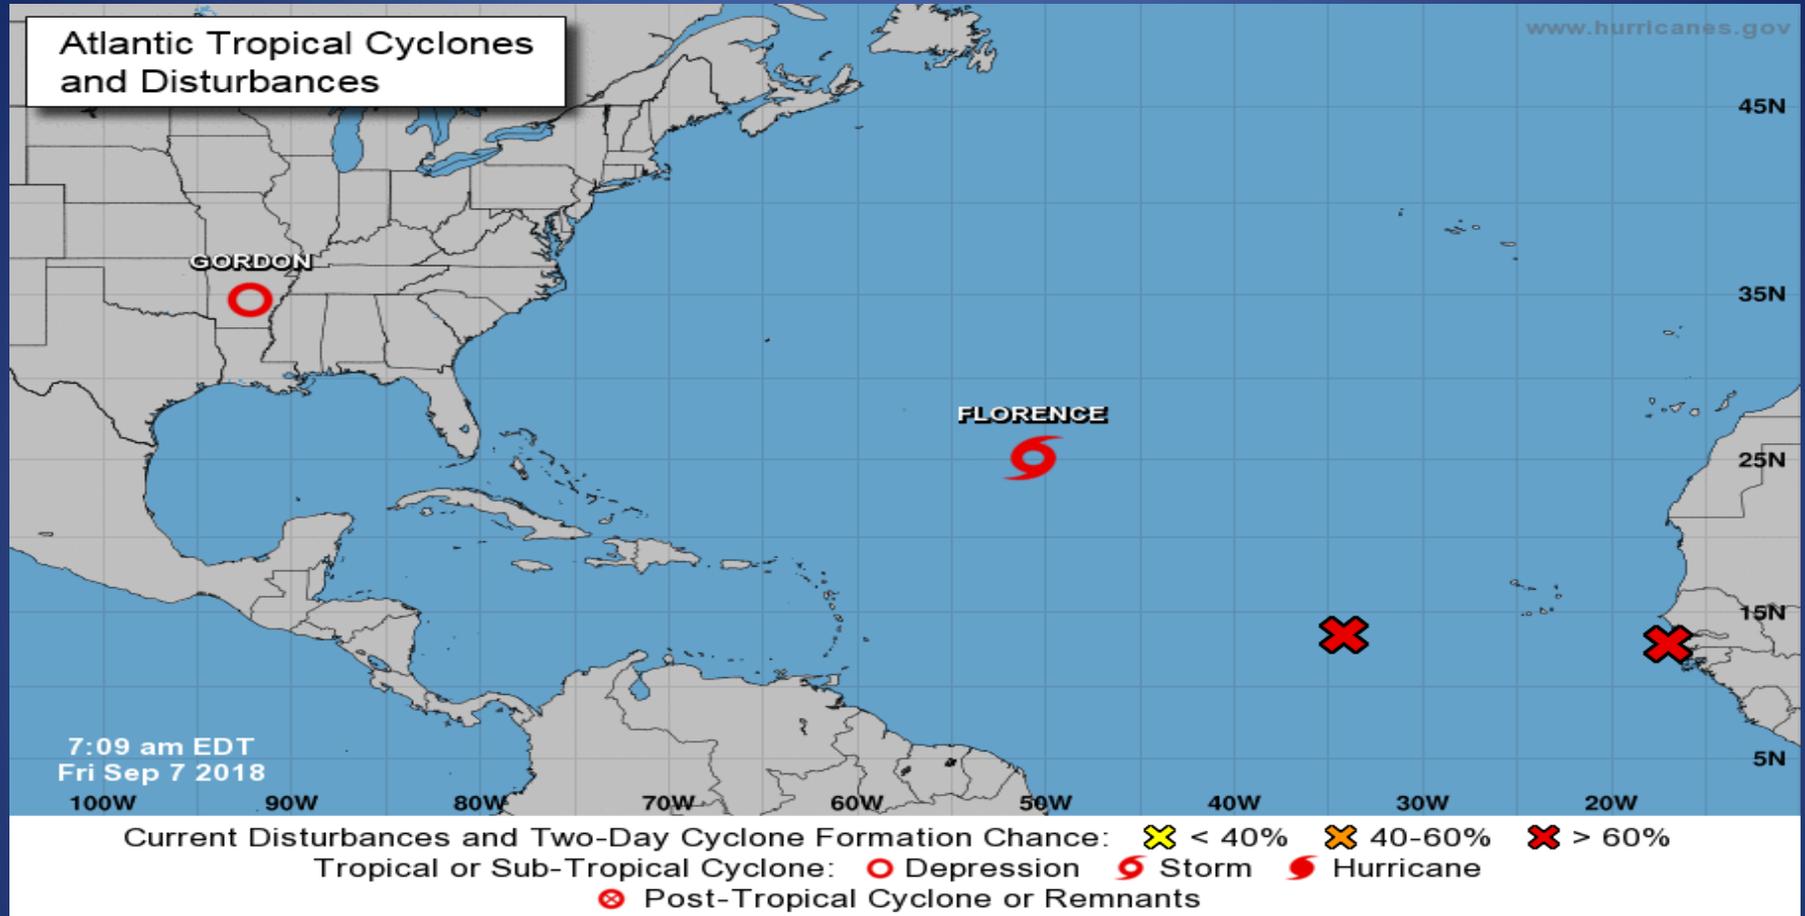

### Situation Awareness Brief

Friday, September 7<sup>th</sup> 2018  
As of 0900 CST

# Tropical Weather Awareness

Satellite images indicate that the circulation of a low pressure system located about 650 miles west of the Cabo Verde Islands is gradually becoming better defined. In addition, the associated showers and thunderstorms remain fairly concentrated near the center. This system is expected to become a tropical depression later today or tonight while it moves slowly westward across the tropical Atlantic Ocean. \* Formation chance through 48 hours high 90 percent. \* Formation chance through 5 days high 90 percent. Showers and thunderstorms continue to become better organized in association with a low pressure system located just off the west coast of Africa. Environmental conditions are conducive for development, and a tropical depression or tropical storm is expected to form later today or tonight while the low moves westward or west-northwestward over the far eastern tropical Atlantic Ocean. Interests in the Cabo Verde Islands should monitor the progress of this system. \* Formation chance through 48 hours high 90 percent. \* Formation chance through 5 days high 90 percent.

# Hazardous Weather

**FRIDAY**

Cool, With Thunderstorms

Weather Forecast Office  
El Paso, TX  
Issued Sep 06, 2018 10:10 PM MDT

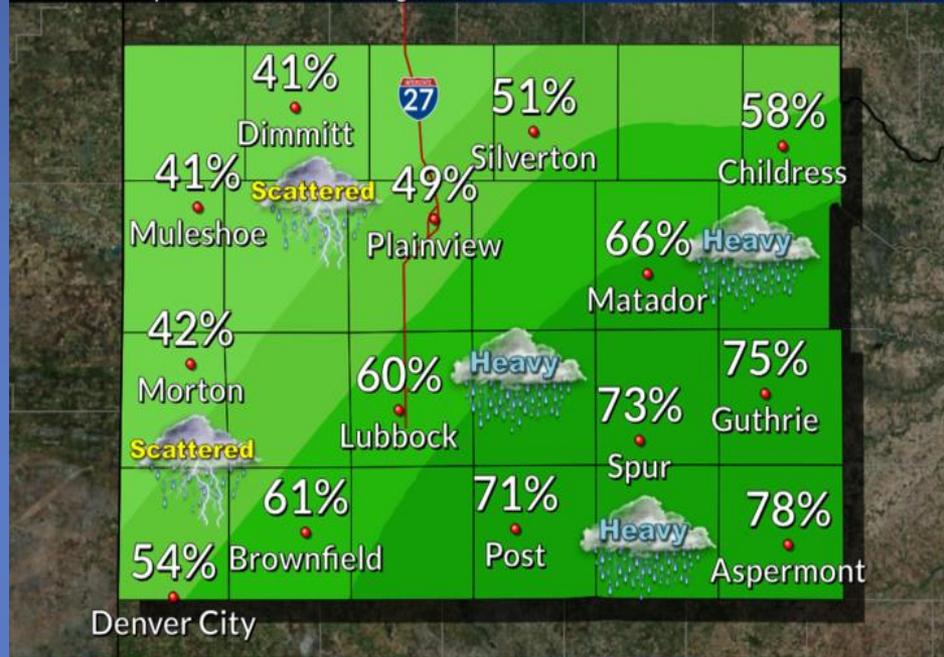

@NWSEIPaso

weather.gov/epz

**Areas of Rain and Isolated Storms Today**

Pockets of Heavy Rain and Localized Flooding will occur

Weather Forecast Office  
Lubbock, TX  
Issued Sep 07, 2018 6:02 AM CDT

NWSLubbock

weather.gov/lub

Southerly flow aloft will bring the Borderland one more day of moist air and scattered thunderstorms, before thunderstorms taper off over the weekend. The best chance of thunderstorms will be in the mountains. A few storms could produce heavy rain, pea size hail and wind gusts of 40 to 50 mph. Temperatures will remain on the cool side due to cloud cover.

Areas of rain and isolated thunderstorms will affect the region today. The most widespread rainfall will impact spots off the Caprock, though everyone will have chances of seeing rain. Very rich moisture will support pockets of heavy rainfall and localized flooding. Never attempt to drive through flooded roadway!

# Hazardous Weather

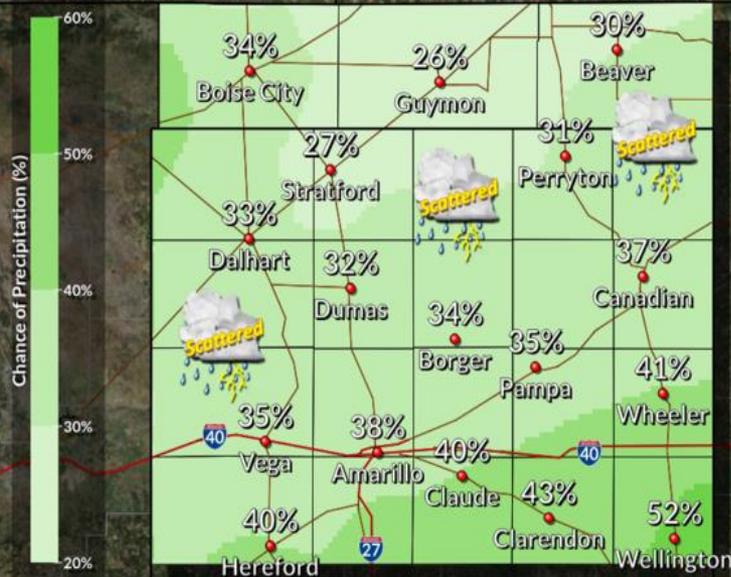

## Today's Chances for Rain

Weather Forecast Office  
Amarillo, TX

Isolated to Scattered Showers and Storms Continue

Issued Sep 07, 2018 5:38 AM CDT

weather.gov/ama

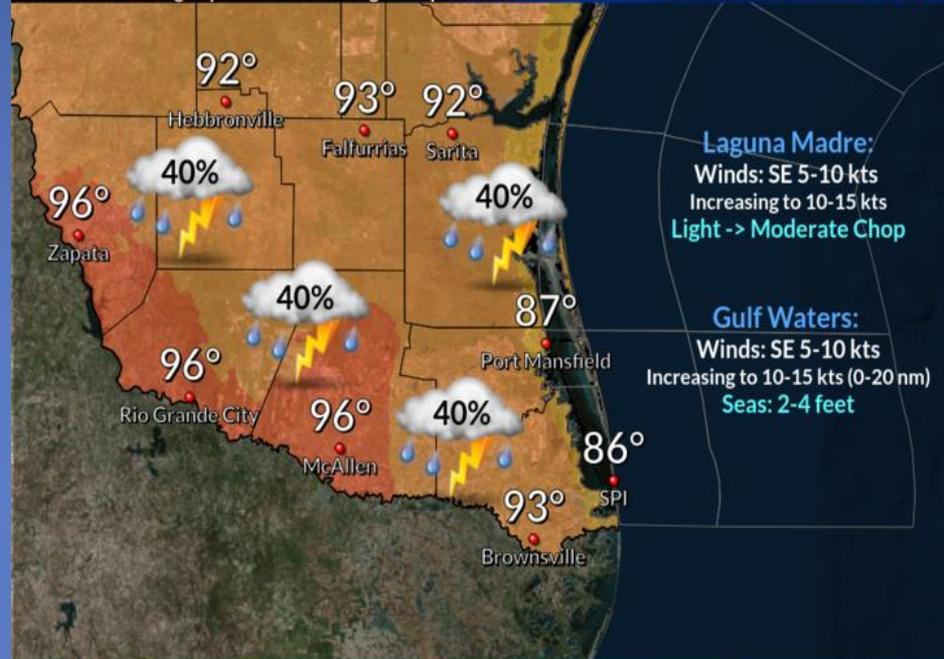

## Showers and Thunderstorms

Weather Forecast Office  
Brownsville/RGV, TX

Near Normal to Slightly Below Normal High Temperatures

Issued Sep 07, 2018 5:33 AM CDT

@NWSBrownsville

weather.gov/rgv

Along with our mild conditions, chances for scattered showers and storms will continue today. While all of us have a chance of picking up some rain, areas south of Interstate 40 will have the best chance.

Showers and thunderstorms expected again today, with slightly less coverage than yesterday. Temperatures top off near to a few degrees below normal. Mariners will find a light chop building to a moderate chop on the bay with Gulf seas of 2-4 feet.

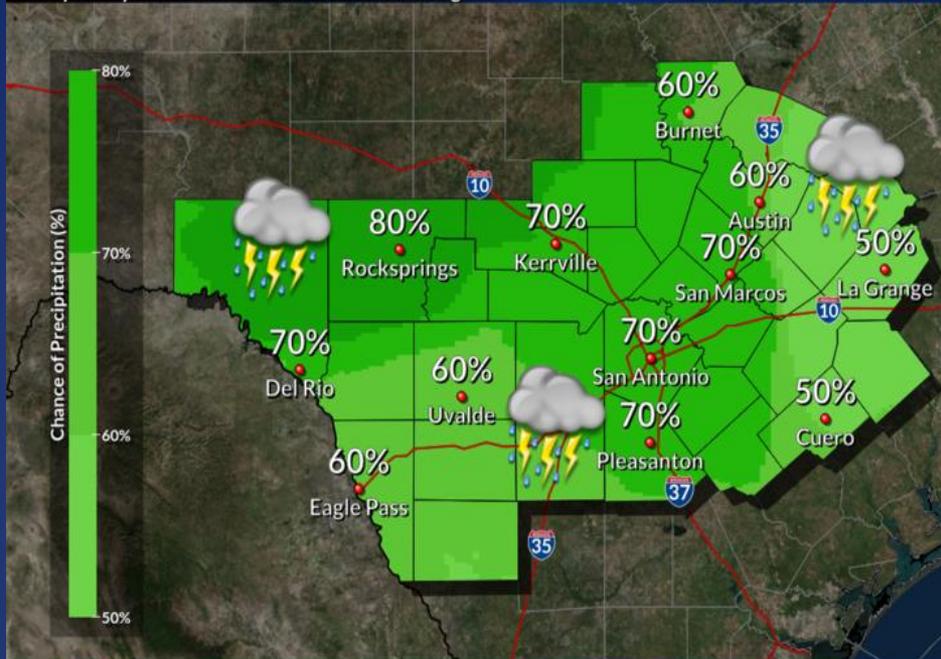

# Hazardous Weather

## Scattered to Numerous Showers & Storms

Weather Forecast Office  
Austin/San Antonio, TX  
Issued Sep 07, 2018 5:28 AM CDT

Locally Heavy Rainfall Could Lead to Minor Flooding

NWSSanAntonio

[weather.gov/ewx](http://weather.gov/ewx)

A series of disturbances will combine with a moist tropical airmass over South Central Texas to generate scattered to numerous showers and thunderstorms today. Isolated areas of heavy rains are possible and may lead to minor flooding, especially in those areas that have had significant rainfall recently. Wind gusts up to 40 mph are possible with the stronger storms. Below normal temperatures are expected, with highs in the lower 80s to lower 90s.

## Flash Flood Watch For West Central Texas

Weather Forecast Office  
San Angelo, TX  
Issued Sep 07, 2018 4:06 AM CDT

Today through Late Tonight

### TIMING:

- From 7 AM CDT this morning through late tonight

### DETAILS:

- Showers and thunderstorms with heavy rain producing rainfall rates of 1 to 3 inches per hour. This, in addition to already saturated soils, will result in an increased threat of flash flooding.

### IMPACTS:

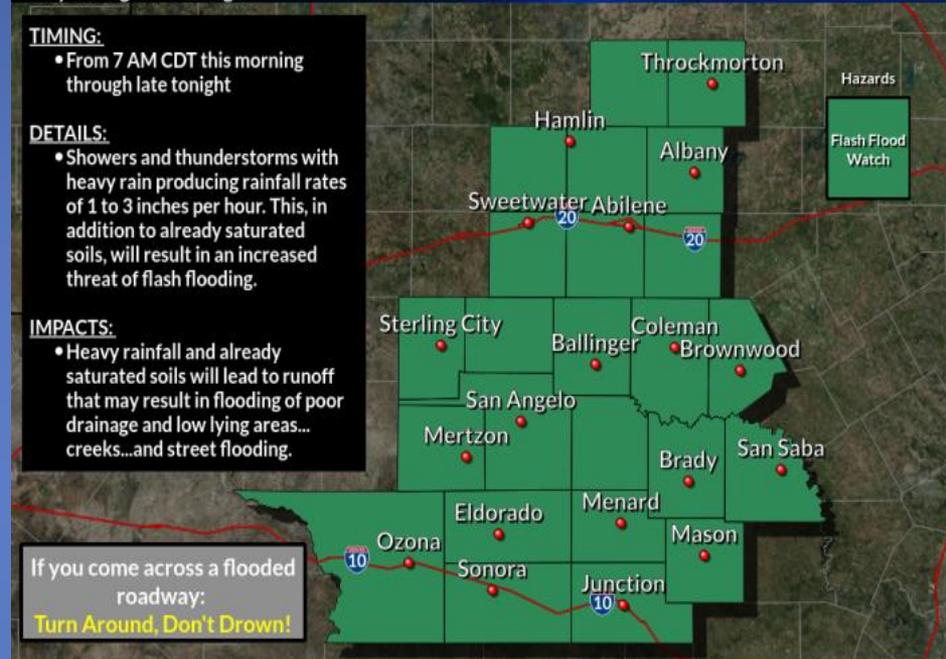

- Heavy rainfall and already saturated soils will lead to runoff that may result in flooding of poor drainage and low lying areas... creeks...and street flooding.

If you come across a flooded roadway:  
**Turn Around, Don't Drown!**

NWSSanAngelo

[weather.gov/sjt](http://weather.gov/sjt)

Showers and thunderstorms with heavy rain will lead to an increased threat for flash flooding today and tonight. A Flash Flood Watch has been issued. Remember to Turn Around, Don't Drown should you come across a flooded roadway!

# Hazardous Weather

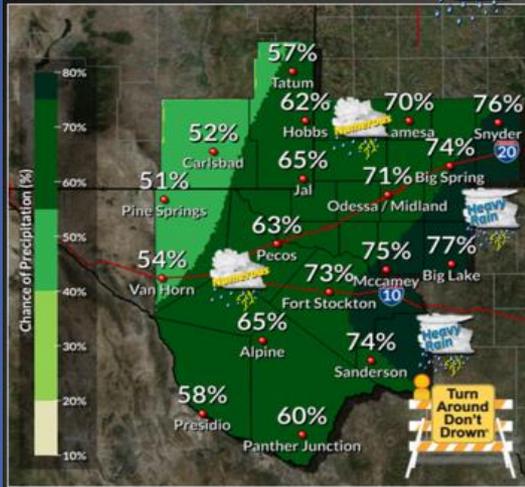

Today

Rainy with much below-normal temperatures.

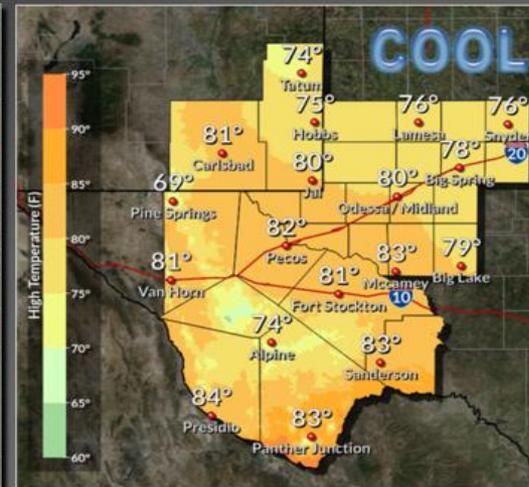

Weather Forecast Office  
Midland/Odessa, TX  
Issued September 7, 2018 3:44 AM CT

## Chance of Rain

## Temperatures

NWSMidland

[weather.gov/maf](http://weather.gov/maf)

Scattered to numerous showers and thunderstorms are expected again today. Some of the showers and storms may produce heavy rainfall, if not localized flash flooding. Please slow down if driving in heavy rainfall, and watch out for water over roads.
